Burning the Books Richard Ovenden, 2020-10-13 The director of the famed Bodleian Libraries at Oxford narrates the global history of the willful destruction and surprising survival of recorded knowledge over the past three millennia Libraries and archives have been attacked since ancient times but have been especially threatened in the modern era Today the knowledge they safeguard faces purposeful destruction and willful neglect deprived of funding libraries are fighting for their very existence Burning the Books recounts the history that brought us to this point Richard Ovenden describes the deliberate destruction of knowledge held in libraries and archives from ancient Alexandria to contemporary Sarajevo from smashed Assyrian tablets in Iraq to the destroyed immigration documents of the UK Windrush generation He examines both the motivations for these acts political religious and cultural and the broader themes that shape this history He also looks at attempts to prevent and mitigate attacks on knowledge exploring the efforts of librarians and archivists to preserve information often risking their own lives in the process More than simply repositories for knowledge libraries and archives inspire and inform citizens In preserving notions of statehood recorded in such historical documents as the Declaration of Independence libraries support the state itself By preserving records of citizenship and records of the rights of citizens as enshrined in legal documents such as the Magna Carta and the decisions of the US Supreme Court they support the rule of law In Burning the Books Ovenden takes a polemical stance on the social and political importance of the conservation and protection of knowledge challenging governments in particular but also society as a whole to improve public policy and funding for these essential institutions

country **Ancient Libraries** Jason König, Katerina Oikonomopoulou, Greg Woolf, 2013-04-25 The circulation of books was the motor of classical civilization. However, books were both expensive and rare, and so libraries, private and public, royal and civic, played key roles in articulating intellectual life. This collection, written by an international team of scholars, presents a fundamental reassessment of how ancient libraries came into being, how they were organized, and how they were used. Drawing on papyrology and archaeology, and on accounts written by those who read and wrote in them, it presents new research on reading cultures, on book collecting, and on the origins of monumental library buildings. Many of the traditional stories told about ancient libraries are challenged. Few were really enormous; none were designed as research centres, and occasional conflagrations do not explain the loss of most ancient texts. But the central place of libraries in Greco-Roman culture emerges more clearly than ever. Naked Statues, Fat Gladiators, and War Elephants Garrett Ryan, 2021-09-01 Why didn't the ancient Greeks or Romans wear pants? How did they shave? How likely were they to drink fine wine, use birth control, or survive surgery? In a series of short and humorous essays, *Naked Statues, Fat Gladiators, and War Elephants* explores some of the questions about the Greeks and Romans that ancient historian Garrett Ryan has answered in the classroom and online. Unlike most books on the classical world, the focus is not on famous figures or events but on the fascinating details of daily life. Learn the answers to: How tall were the ancient Greeks and Romans? How long did they live? What kind of pets did they have? How dangerous were their cities? Did they believe their myths? Did they believe in ghosts, monsters, and/or aliens? Did they jog or lift weights? How did they capture animals for the Colosseum? Were there secret police, spies, or assassins? What happened to the city of Rome after the Empire collapsed? Can any families trace their ancestry back to the Greeks or Romans?

Hands Around the Library Karen Leggett Abouraya, 2012-08-30 The inspiring true story of demonstrators standing up for the love of a library from a New York Times bestselling illustrator. In January 2011, in a moment that captured the hearts of people all over the world, thousands of Egypt's students, library workers, and demonstrators surrounded the great Library of Alexandria and joined hands, forming a human chain to protect the building. They chanted "We love you, Egypt" as they stood together for the freedom the library represented. Illustrated with Susan L. Roth's stunning collages, this amazing true story demonstrates how the love of books and libraries can unite a country even in the midst of turmoil. Alexandria Theodore Vrettos, 2010-06-15 Alexandria was the greatest cultural capital of the ancient world. Accomplished classicist and author Theodore Vrettos now tells its story for the first time in a single volume. His enchanting blend of literary and scholarly qualities makes stories that played out among architectural wonders of the ancient world come alive. His fascinating central contention that this amazing metropolis created the western mind can now take its place in cultural history. Vrettos describes how and why the brilliant minds of the ages—Greek scholars, Roman emperors, Jewish leaders, and fathers of the Christian Church—all traveled to the shining port city. Alexander the Great founded it in 332 B.C. at the mouth of the mighty Nile. There they enjoyed learning from an extraordinary population of peaceful citizens whose rich intellectual life would quietly build

the science art faith and even politics of western civilization No one has previously argued that unlike the renowned military centers of the Mediterranean such as Rome Carthage and Sparta Alexandria was a city of the mind In a brief section on the great conqueror and founder Alexander we learn that he himself was a student of Aristotle In Part Two of his majestic story Vrettos shows that in the sciences the city witnessed an explosion Aristarchus virtually invented modern astronomy Euclid wrote the elements of geometry and founded mathematics amazingly Eratosthenes precisely figured the circumference of the earth and 2 500 years before Freud the renowned Alexandrian physician Erasistratus identified a mysterious connection between sexual problems and nervous breakdowns What could so cerebral a community care about geopolitics As Vrettos explains in the third part of this epic saga if Rome wanted power and prestige in the Mediterranean the emperors had to secure the good will of the ruling class in Alexandria Julius Caesar brought down the Roman Republic and then almost immediately had to go to Alexandria to secure his power base So begins a wonderfully told story of political intrigue that doesn't end until the Battle of Actium in 33 B C when Augustus Caesar defeated the first power couple Anthony and Cleopatra The fourth part of Alexandria focuses on the sphere of religion and for Vrettos its center is the famous Alexandrian Library The chief librarian commissioned the Septuagint the oldest Greek version of the Old Testament which was completed by Jewish intellectuals Local church fathers Clement and Origen were key players in the development of Christianity and the Coptic religion with its emphasis on personal knowledge of God flourished Vrettos has blended compelling stories with astute historical insight Having read all the ancient sources in Ancient Greek Hebrew and Latin himself he has an expert's knowledge of the everyday reality of his characters and setting No reader will ever forget walking with him down this lost city's beautiful dazzling streets

Libricide Rebecca Knuth, 2003-07-30 Where they have burned books they will end in burning human beings declared German poet Heinrich Heine This book identifies the regime sponsored ideologically driven and systemic destruction of books and libraries in the 20th century that often served as a prelude or accompaniment to the massive human tragedies that have characterized a most violent century Using case studies of libricide committed by Nazis Serbs in Bosnia Iraqis in Kuwait Maoists during the Cultural Revolution in China and Chinese Communists in Tibet Knuth argues that the destruction of books and libraries by authoritarian regimes was sparked by the same impulses toward negation that provoked acts of genocide or ethnocide Readers will learn why some people even those not subject to authoritarian regimes consider the destruction of books a positive process Knuth promotes understanding of the reasons behind extremism and patterns of cultural terrorism and concludes that what is at stake with libricide is nothing less than the preservation and continuation of the common cultural heritage of the world Anyone committed to freedom of expression and humanistic values will embrace this passionate and valuable book
